

DR. ZACK ZAIBAK

WHY DID YOU BECOME A COSMETIC DENTIST I like that dentistry incorporates beauty, art and science **FAVORITE PART OF YOUR JOB** My patients' happiness when they see their new smile for the first time **BEST ADVICE YOU'VE RECEIVED** My father always told me to be the best that you can be **I START EACH DAY** Being thankful for the wonderful people I interact with

**SMILE SAVVY**

Dr. Zaibak is devoted to creating **CUSTOM SMILES** that fit each patient's face and personality. Cutting-edge technology such as computer imaging allows a patient to choose their ideal tooth shade and shape, while viewing their selections in a 3-D mockup of their own mouth. "There are many ways to bring a **BRIGHT, BEAMING SMILE** into fruition, including **INVISALIGN** and Lumineers. Invisalign helps achieve straighter teeth with removable devices while conveniently eliminating the need for metal wires." Likewise, Lumineers can completely transform a smile within two visits and correct chipped, gapped and uneven teeth. "Lumineers are permanently mounted, stain-resistant and clinically proven to last for years. I believe in them so much that not only do I wear them, myself, I've used them on my mother and family as well; so, when I say that I treat my patients like family, patients can truly take it to heart."

INSIDE INFORMATION

*Dr. Zaibak is a licensed general dentist in the state of Illinois.

a true conservative

A passion for designing healthy, attractive smiles compels cosmetic dentist Dr. Zack Zaibak to offer patients "natural-looking smiles in as noninvasive a way as possible." Patients of the Zaibak Center for Aesthetic Dentistry include a pageant winner in a Mrs. Illinois America competition, media personalities, professional athletes and homemakers, all treated to a serene spa-like experience that includes plush massage dental chairs and ceiling-mounted flat-screen televisions in a cozy residential-style setting.

Employing an innovative approach that seeks to eliminate the incorporation of shots, Dr. Zaibak relies on Invisalign and Lumineers, a type of veneer that requires very little drilling if any at all, to make over patients' smiles. "Lumineers are not only resistant to stains, they're reversible, contact-lens thin and great for masking blemishes that would otherwise get in the way of a gorgeous smile," says Dr. Zaibak, whose upcoming book, *Chicago Smiles*, is set to hit stands August 2010. "My philosophy involves designing natural smiles in a conservative and biocompatible way." Media outlets such as ABC 7, WGN 9, the *Chicago Tribune*, Fox news, *Chicago Sun-Times* and *Chicago Magazine* have recognized Dr. Zaibak, and the Consumers' Research Council of America recently named him one of the country's top dentists for 2010. "We live in a youth-driven culture that adores beauty, and a sparkling smile is one of the first things people notice. Now, with modern technology, it is possible to completely restore your smile."

Stressing attention to detail, Dr. Zaibak is diligent when performing smile makeover procedures like Lumineers and Invisalign, for example. "I partner with patients to custom-create smiles that exceed their expectations," says Dr. Zaibak, who remains up-to-date on technological advancements by continually studying innovations as they become available. "I have been a guest speaker for Lumineers, and I enjoy educating other dentists about the results this advancement can bring about. The field is exciting because it's always evolving, and new materials are always on the horizon. Every patient deserves top-notch results, and that requires knowing what is available."
